

NUMAN ANEES

Software Engineer | Tech Enthusiast | Problem Solver

@ numananees44@gmail.com

☎ (+92) 3014781410

📍 Lahore, Pakistan

EXPERIENCE

Full-Stack Developer

Megaverse

📅 June 2022 – September 2022

📍 Lahore

- Worked in Reactjs, Nextjs, tailwind on frontend and GraphQL, Nodejs, Expressjs, MongoDB and PostgreSQL at the server side.
- Collaborated with fellow engineers to develop and deploy **SellerDash** a web portal for sellerdash chrome extension which is **1st Pakistani** product hunting tool for Daraz.
- Worked on sellerdash **chrome extension** and enhanced performance by decreasing the response time from 4 minutes to just **30 seconds**.

PROJECTS

TopDish

🔗 [View Live](#)

📄 [Github](#)

nextjs, nodejs, expressjs, mongodb

- Main goal of this website is to give people a **platform** where they can find the best restaurant for a **specific** dish in the whole city.
- Google map allows users to give ratings about the whole restaurant not the specific dish of a restaurant. I tried to solve this problem using the **upvote** system.

Fanoon

🔗 [View Live](#)

📄 [Github](#)

flutter, nodejs, expressjs, mongodb

- Fanoon is the social marketplace that allows users to discover, buy, and sell arts and crafts.
- It is a place for artists where they can create their digital art galleries and get national recognition.
- Artists cannot only sell unique things like paintings but can also give **services** like rice grain art, pencil lead art, etc.

Sandhu Rent a Car

🔗 [View Live](#)

📄 [Github](#)

reactjs, nodejs, expressjs, mongodb, stripe

- Created this Rent a car website where Customers can book the cars by paying through Stripe.
- Admin can see the bookings and can manage the cars.
- If a car is **booked** for a time span no other customer can book the same car on the same time span.
- It includes a chatbot for helping customers with bookings and customers can send complaints or feedback to Admin's email.
- **Open Sourced project** currently used by many students.

VeteranMeet

📄 [Github](#)

reactjs, nodejs, expressjs, mongodb

- It is a social media platform for Veterans where they can find and **connect** with other veterans and join organizations.
- Veterans can create, view, and join events and can also send event **invitations** to other veterans which they can accept or reject.

EDUCATION

Bachelor in Software Engineering

PUCIT - UNIVERSITY OF THE PUNJAB

📅 Sep 2019 – June 2023

CGPA : 3.20

SKILLS

C/C++

Java

JavaScript

TypeScript

ReactJs

NextJs

Tailwind Css

PostgreSQL

MongoDB

NodeJs

ExpressJs

Rest APIs

GraphQL

Git & Github

Data Structures & Algorithms

ACHIEVEMENTS

NaSCon'22

Winner of Web Development Competition

- Developed a fully functional responsive website **VeteranMeet** in **12 hours**.
- Received a winning cash prize of Rs.50,000.

SOFTEC'22

2nd Runner up in Website Development

- Coded a full stack **Website** in **24 hours** for patients and doctors.
- Patients can search doctors based on their speciality, review doctors, and book appointments with doctors.
- Doctors can manage and schedule appointments.

Open Source Contributor

Applied in Google Summer of Code (GSOC)

- Submitted my proposals in Code is Science organization.
- Opened **3 issues** and my **2 PRs** got merged in the project.
